**Actual Plugging Report:** 

This well was plugged prior to my employment with the KCC. I contacted Chaperrel Energy LLC which is the company that aguired Calumet-Eaken Gas Company and they provided the following information about the plugging of this well. Consolidated Oil Well Services hooked onto casing and pumped 120 sacks of cement down casing. Well was shut in with 400 psi on casing. Well cut off and location restored. Cement invoice #217021 attached. I gps'd well location I found below ground and corrected accordingly.
