Re: Ringwald 1-21
NE/4 Sec. 21-28S-21W
Ford County, Kansas
15-057-20969-00-00

Dear Sir or Madam:

This letter is to inform you that you have been granted an additional extension of time in which to close the drilling pits associated with the Ringwald 1-21 well.

The original 365 days for closure expired on 12/07/2016. This extension will expire 06/07/2017. **No additional extensions will be granted.** In the event there is water standing in these pits, please dewater and dispose of fluids in an authorized disposal facility to expedite closure. Extension of this time frame automatically extends the time period for filing the closure of surface pit form, **but not the time period for filing the waste transfer form (CDP-5).**

Failure to close the pit prior to the expiration date shall result in a monetary penalty in accordance with K.A.R. 82-3-602(a).

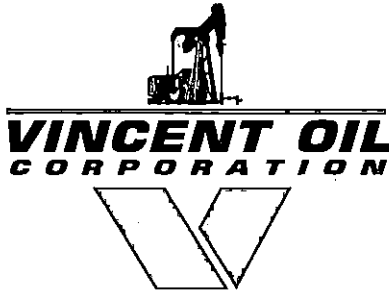

Please complete the pit closure form (CDP-4) through Kolar (Kansas On-Line Automated Reporting) at <https://kolar.kgs.ku.edu>.

If you have any questions in this regard, please do not hesitate to contact Kathy Haynes at (316) 337-6243.

Sincerely,

Ryan A. Hoffman
Director

Dear Ms. Rains:

Vincent Oil Corporation is requesting an additional extension to the requirements for pit closure for a reserve pit associated with the above referenced well. By letter dated 12/8/2016 we requested a 120 day extension beyond the original required closure date of December 7, 2016. By letter from the KCC dated December 9th, 2017 Vincent Oil Corporation was given a 90 day extension to close the pit or file for an additional extension. Such closure or request for extension would need to be accomplished by March 7th 2017.

Since that extension date our dirt contractor has done additional work at the site, but an inspection of about a week and a half ago (on or about February 13, 2017) showed that the site still needed some additional drying before final closure. While our contractor thinks the pit might be ready for closure by the March 7th deadline there is still some doubt as to if that is possible. Thus we are therefore requesting an 30 day extension beyond the current closure time frame of March 7, 2017.

Should you or the field staff have any questions or require additional information with regard to this request concerning this pit please contact me at the above letterhead address or telephone number.

Sincerely,

M.L. Korphage P.G.
Geologist
Vincent Oil Corporation

Dear Sir or Madam:

This letter is to inform you that you have been granted an extension of time in which to close the drilling pits associated with the Ringwald 1-21 well.

The original 365 days for closure expired on 12/07/2016. This extension will expire on 03/07/2017. We urge you to make every effort to close these pits within this time frame. In the event there is water standing in these pits, please dewater and dispose of fluids in an authorized disposal facility to expedite closure. Extension of this time frame automatically extends the time period for filing the closure of surface pit form, **but not the time period for filing the waste transfer form (CDP-5).**

*Failure to close the pit or request an additional extension prior to the expiration date shall result in a monetary penalty in accordance with K.A.R. 82-3-602(a). An additional pit extension may be renewed upon request, but **no pit permit extension shall be extended beyond six months after the original deadline.***

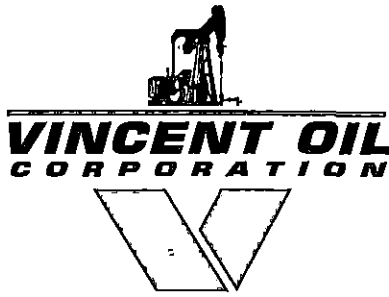

Please complete the pit closure form (CDP-4) through Kolar (Kansas On-Line Automated Reporting) at <https://kolar.kgs.ku.edu>.

If you have any questions in this regard, please do not hesitate to contact Kathy Haynes at (316) 337-6243.

Sincerely,

Dear Ms. Rains:

Per our telephone conversation of this date Vincent Oil Corporation is requesting an extension to the requirements for pit closure for a reserve pit associated with the above referenced well. We are requesting a 120 day extension beyond the original required closure date of December 7, 2016.

We have made several attempts to complete the pit closure, as evidenced by the attached invoices for work performed at the site, but have been unsuccessful. The fact that the acreage where the pit is located under overhead irrigation during a good portion of this last year has to a certain extent added to our difficulty completing closure. A site inspection by our dirt contractor on this date indicated that the pit is still too wet to close. Thus we are requesting this 120 day extension in hopes that the current crop will be off by that time frame.

Should you or the field staff have any questions or require additional information with regard to this request concerning this pit please contact me at the above letterhead address or telephone number.

Sincerely,

M.L. Korphage P.G.
