**Findings:**

I arrived on the Goff Lease in the morning of 4/17/2017. I went to the location where well #2 was suppose to be located. No well was present above surface at this location. I used a metal detector and walked an area approximately 200' around where well #2 was suppose to be located. No metal was detected below surface. The area does not appear to have had any oilfield activiety around this location.
