(Describe briefly the manner in which well was plugged)

Hole filled with mud to ~~3000 feet~~ at least 2800 feet.

And mudded from below surface pipe to top.

(I was at this well on October 12, as the operator started work of plugging, but didn't have time to get around to it after that until today. Haven't full details of the plugging, but do know that mud as stated above was put in the hole. Understand the hole was, however, filled with mud from bottom to top.)
