RE: Workover Pit Application
Lawrence Lease Well No. 1
SW/4 Sec. 21-18S-11W
Barton County, Kansas

15-009-20393-00-00

Dear Mr. Parrish:

District staff has reviewed the above referenced location and has determined that if the pit construction encounters saltwater the pit must be lined. A plastic liner with the minimum thickness of 6 mil is to be used. Integrity of the liner must be maintained at all times. The fluids must be removed from the pit after workover operations have ceased. Please file the enclosed CDP-5 form, Surface Waste Transfer, within 30 days if fluids are removed.

If you have any questions or concerns please feel free to contact the undersigned at the above address.

Sincerely,

A handwritten signature in cursive script that reads "Kathleen Haynes".

Kathleen Haynes
Environmental Protection and Remediation Department
