S1-30-7W

Dear Mr. Anderson,

In reference to your letter dated April 7, 1992, following is the information you have requested.

The formation drilled to, and to be produced out of is the Mississippi. It was encountered at 4094' and goes to below the TD.

As a result of BPI performing all aspects of the oilfield services when we are able, we did not hire a geologist. Therefore, we have no geologist well report.

If you require any further information, please feel free to call me at (316) 532-2770. I will make every attempt to supply the needed information.

Sincerely,

Douglas P. Bramwell
