

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																																																																	
County: Sedgwick		NW ¼ NW ¼ NE ¼		14		T 28 S		R 1 EXX																																																																																																	
Distance and direction from nearest town or city street address of well if located within city? Approximately 1/8 mile south and 1/8 mile east of Wichita																																																																																																									
2 WATER WELL OWNER:		Boeing Company																																																																																																							
RR#, St. Address, Box # :		3801 S. Oliver																																																																																																							
City, State, ZIP Code :		Wichita, KS 67210																																																																																																							
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL: 47.5 ft. ELEVATION: unknown																																																																																																							
		Depth(s) Groundwater Encountered 1. ft. 2. ft. 3. ft.																																																																																																							
		WELL'S STATIC WATER LEVEL 15.45 ft. below land surface measured on mo/day/yr 8-13-92																																																																																																							
		Pump test data: Well water was not ch'd ft. after hours pumping gpm																																																																																																							
		Est. Yield unknown gpm: Well water was ft. after hours pumping gpm																																																																																																							
		Bore Hole Diameter 1.1 in. to 47.5 ft., and in. to ft.																																																																																																							
WELL WATER TO BE USED AS:		5 Public water supply 8 Air conditioning 11 Injection well																																																																																																							
1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below)																																																																																																									
2 Irrigation 4 Industrial 7 Lawn and garden only 10 Monitoring well Recovery																																																																																																									
Was a chemical/bacteriological sample submitted to Department? Yes No X If yes, mo/day/yr sample was sub- mitted Water Well Disinfected? Yes No X																																																																																																									
5 TYPE OF BLANK CASING USED:																																																																																																									
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued . . X . . Clamped																																																																																																									
2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded																																																																																																									
Blank casing diameter 5 in. to 18 ft., Dia in. to ft., Dia in. to ft.																																																																																																									
Casing height above land surface 24 in., weight 2.87 lbs./ft. Wall thickness or gauge No. 265																																																																																																									
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																																																									
1 Steel 3 Stainless steel 5 Fiberglass 7 PVC 10 Asbestos-cement																																																																																																									
2 Brass 4 Galvanized steel 6 Concrete tile 8 RMP (SR) 11 Other (specify)																																																																																																									
SCREEN OR PERFORATION OPENINGS ARE:																																																																																																									
1 Continuous slot 3 Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																																																									
2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes																																																																																																									
7 Torch cut 10 Other (specify)																																																																																																									
SCREEN-PERFORATED INTERVALS: From 18 ft. to 45.5 ft., From ft. to ft.																																																																																																									
From ft. to ft., From ft. to ft.																																																																																																									
GRAVEL PACK INTERVALS: From 16 ft. to 47.5 ft., From ft. to ft.																																																																																																									
From ft. to ft., From ft. to ft.																																																																																																									
6 GROUT MATERIAL: 1 Neat cement 2 Cement grout 3 Bentonite 4 Other Bentonite Holeplug																																																																																																									
Grout Intervals: From ft. to ft., From ft. to ft., From 0 ft. to 16 ft.																																																																																																									
What is the nearest source of possible contamination:																																																																																																									
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well																																																																																																									
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/Gas well																																																																																																									
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below)																																																																																																									
Direction from well? How many feet? Ground already contaminated
