

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																										
County: Pawnee		SW 1/4 NE 1/4 SW 1/4		27		T 21 S		R 19 EW																																																										
Distance and direction from nearest town or city street address of well if located within city? inside the city of Rozel, KS																																																																		
2 WATER WELL OWNER: Tri-Ag-Coop																																																																		
RR#, St. Address, Box # : Rt #3																																																																		
City, State, ZIP Code : Larned, KS 67550																																																																		
Board of Agriculture, Division of Water Resources Application Number:																																																																		
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL: 52 ft. ELEVATION: unknown																																																																
		Depth(s) Groundwater Encountered 1. 42.5 ft. 2. . ft. 3. . ft.																																																																
		WELL'S STATIC WATER LEVEL . 42.5 . ft. below land surface measured on mo/day/yr																																																																
		Pump test data: Well water was . not ch'd . ft. after hours pumping gpm																																																																
		Est. Yield . unknown . gpm: Well water was ft. after hours pumping gpm																																																																
		Bore Hole Diameter 5 . in. to 50 . . ft., and in. to ft.																																																																
WELL WATER TO BE USED AS:																																																																		
1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below)																																																																		
2 Irrigation 4 Industrial 7 Lawn and garden only 10 Monitoring well																																																																		
Was a chemical/bacteriological sample submitted to Department? Yes No X; If yes, mo/day/yr sample was submitted																																																																		
Water Well Disinfected? Yes ☒ No																																																																		
5 TYPE OF BLANK CASING USED:																																																																		
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued Clamped																																																																		
2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded																																																																		
7 Fiberglass Threaded																																																																		
Blank casing diameter 2 1/2 . in. to 50 . . ft., Dia in. to ft., Dia in. to ft.																																																																		
Casing height above land surface 24 . . . in., weight 60.4 . . . lbs./ft. Wall thickness or gauge No. 110																																																																		
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																		
1 Steel 3 Stainless steel 5 Fiberglass 7 PVC 10 Asbestos-cement																																																																		
2 Brass 4 Galvanized steel 6 Concrete tile 8 RMP (SR) 11 Other (specify)																																																																		
9 ABS 12 None used (open hole)																																																																		
SCREEN OR PERFORATION OPENINGS ARE:																																																																		
1 Continuous slot 3 Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																		
2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes																																																																		
7 Torch cut 10 Other (specify)																																																																		
SCREEN-PERFORATED INTERVALS: From ft. to ft., From ft. to ft.																																																																		
From ft. to ft., From ft. to ft.																																																																		
GRAVEL PACK INTERVALS: From 30 . . . ft. to 60 . . . ft., From ft. to ft.																																																																		
From ft. to ft., From ft. to ft.																																																																		
6 GROUT MATERIAL: 0 1 Neat cement 2 Cement grout 60 3 Bentonite 4 Other . . . Bentonite Hole Plug																																																																		
Grout intervals: From ft. to ft., From ft. to ft., From ft. to ft.																																																																		
What is the nearest source of possible contamination:																																																																		
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well																																																																		
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/Gas well																																																																		
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below)																																																																		
13 Insecticide storage pond																																																																		
Direction from well? How many feet?
