Revised 1/20/2015
Water Right Information represents conditions as of 03/19/2023.

Information shown on this page depends on a water right's selected Type(s) of Use and point of diversion, PD(s). If there are multiple uses and/or multiple points of diversion, the page will update details, quantity and rate, and reported water use depending on which entry is selected from those list boxes.

Because water rights can overlap both in points of diversion and places of use (which in turn can affect the authorized quantities and rate) AND water usage is often aggregated into a single report, you cannot determine if a water right has reported more water use than authorized from this page only.
