			WELL'S STATIC WATER LEVEL 25.55 ft. below land surface measured on mo/day/yr 12-2-03																																																																																																
Pump test data: Well water was ft. after hours pumping gpm																																																																																																			
Est. Yield gpm: Well water was ft. after hours pumping gpm			Bore Hole Diameter 9 in. to 109 ft., and in. to ft.																																																																																																
WELL WATER TO BE USED AS:			5 Public water supply 8 Air conditioning 11 Injection well																																																																																																
1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering			12 Other (specify below) Test Well																																																																																																
2 Irrigation 4 Industrial 7 Domestic (lawn & garden) 10 Monitoring well																																																																																																			
Was a chemical/bacteriological sample submitted to Department? Yes No <input checked="" type="checkbox"/> If yes, mo/day/yr sample was submitted																																																																																																			
Water Well Disinfected? Yes No <input checked="" type="checkbox"/>																																																																																																			
5 TYPE OF BLANK CASING USED:																																																																																																			
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued Clamped																																																																																																			
2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded																																																																																																			
7 Fiberglass Threaded																																																																																																			
Blank casing diameter 5 in. to 60 ft., Dia 5 in. to 95 ft., Dia in. to ft.																																																																																																			
Casing height above land surface 24 in., weight 2.36 lbs./ft. Wall thickness or gauge No .214																																																																																																			
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																																																			
1 Steel 3 Stainless steel 5 Fiberglass 8 RMP (SR) 10 Asbestos-cement																																																																																																			
2 Brass 4 Galvanized steel 6 Concrete tile 9 ABS 11 Other (specify)																																																																																																			
12 None used (open hole)																																																																																																			
SCREEN OR PERFORATION OPENINGS ARE:																																																																																																			
1 Continuous slot 3 Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																																																			
2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes																																																																																																			
7 Torch cut 10 Other (specify) ft.																																																																																																			
SCREEN-PERFORATED INTERVALS: From 60 ft. to 80 ft., From 95 ft. to 105 ft.																																																																																																			
GRAVEL PACK INTERVALS: From 45 ft. to 79 ft., From 79 ft. to 109 ft.																																																																																																			
6 GROUT MATERIAL: 1 Neat cement 2 Cement grout 3 Bentonite 4 Other Bentonite Holeplug																																																																																																			
Grout Intervals: From 0 ft. to 45 ft., From ft. to ft., From ft. to ft.																																																																																																			
What is the nearest source of possible contamination:																																																																																																			
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well																																																																																																			
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/Gas well																																																																																																			
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below)																																																																																																			
13 Insecticide storage none known																																																																																																			
Direction from well? How many feet?
