

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																																																																			
County: Harvey		SE 1/4 SE 1/4 SW 1/4		29		T 23 S		R 2 E/W																																																																																																			
Distance and direction from nearest town or city street address of well if located within city? Approximately 1 mile north and 3 miles west of Halstead																																																																																																											
2 WATER WELL OWNER:		City of Wichita																																																																																																									
RR#, St. Address, Box # :		455 N. Main				Board of Agriculture, Division of Water Resources																																																																																																					
City, State, ZIP Code :		Wichita, KS 67202				Application Number:																																																																																																					
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL 204 ft. ELEVATION: unknown																																																																																																									
1 Mile		Depth(s) Groundwater Encountered 1. ft. 2. ft. 3. ft.																																																																																																									
		WELL'S STATIC WATER LEVEL not ch'd. ft. below land surface measured on mo/day/yr																																																																																																									
		Pump test data: Well water was not ch'd. ft. after hours pumping gpm																																																																																																									
		Est. Yield unknown gpm: Well water was ft. after hours pumping gpm																																																																																																									
		Bore Hole Diameter. 6 in. to 215 ft., and in. to ft.																																																																																																									
WELL WATER TO BE USED AS:		5 Public water supply 8 Air conditioning 11 Injection well																																																																																																									
1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering Basin 12 Other (Specify below)																																																																																																											
2 Irrigation 4 Industrial 7 Lawn and garden only 10 Monitoring well		Recharge Well																																																																																																									
Was a chemical/bacteriological sample submitted to Department? Yes.....No.....X.....; If yes, mo/day/yr sample was submitted																																																																																																											
Water Well Disinfected? Yes No X																																																																																																											
5 TYPE OF BLANK CASING USED:																																																																																																											
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued X Clamped																																																																																																											
2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded																																																																																																											
7 Fiberglass Threaded																																																																																																											
Blank casing diameter 2 in. to 55 ft., Dia. in. to ft., Dia. in. to ft.																																																																																																											
Casing height above land surface 24 in., weight 96 lbs./ft. Wall thickness or gauge No. 218																																																																																																											
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																																																											
1 Steel 3 Stainless steel 5 Fiberglass 8 RMP (SR) 10 Asbestos-cement																																																																																																											
2 Brass 4 Galvanized steel 6 Concrete tile 9 ABS 11 Other (specify)																																																																																																											
12 None used (open hole)																																																																																																											
SCREEN OR PERFORATION OPENINGS ARE:																																																																																																											
5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																																																											
1 Continuous slot 3 Mill slot 6 Wire wrapped 9 Drilled holes																																																																																																											
2 Louvered shutter 4 Key punched 7 Torch cut 10 Other (specify)																																																																																																											
SCREEN-PERFORATED INTERVALS: From 55 ft. to 202 ft., From ft. to ft.																																																																																																											
From ft. to ft., From ft. to ft.																																																																																																											
GRAVEL PACK INTERVALS: From 54 ft. to 215 ft., From ft. to ft.																																																																																																											
From ft. to ft., From ft. to ft.																																																																																																											
6 GROUT MATERIAL: 1 Neat cement 2 Cement grout 3 Bentonite 4 Other .. Bentonite Holeplug																																																																																																											
Sand & Gravel																																																																																																											
Grout Intervals: From 0 ft. to 4 ft., From ft. to ft., From 4 ft. to 54 ft.																																																																																																											
What is the nearest source of possible contamination:																																																																																																											
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well																																																																																																											
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/Gas well																																																																																																											
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below)																																																																																																											
13 Insecticide storage None known																																																																																																											
Direction from well? How many feet?
