

1] LOCATION OF WATER WELL:		Fraction	Section Number	Township Number	Range Number																																																																																				
County: Harvey		NW ¼ SW ¼ SW ¼	34	T 23 S	R 3 E/W																																																																																				
Distance and direction from nearest town or city street address of well if located within city? ~1/2 mi N of SW 36th & S Prairie Lake Rd, Burrton																																																																																									
2] WATER WELL OWNER: Rose Rock Midstream, L.P.																																																																																									
RR#, St. Address, Box # : 3030 NW Expressway, Ste 1100			Board of Agriculture, Division of Water Resources																																																																																						
City, State, ZIP Code : Oklahoma City, OK 73112			Application Number:																																																																																						
3] LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4] DEPTH OF COMPLETED WELL 25 ft. ELEVATION:																																																																																							
		Depth(s) Groundwater Encountered 1. ft. 2. ft. 3. ft.																																																																																							
		WELL'S STATIC WATER LEVEL ft. below land surface measured on mo/day/yr																																																																																							
		Pump test data: Well water was . . . NA . . . ft. after hours pumping gpm																																																																																							
		Est. Yield . . NA . . gpm: Well water was . . . ft. after hours pumping gpm																																																																																							
		Bore Hole Diameter . . . 8 . . . in. to . . . 25 . . . ft., and in. to ft.																																																																																							
		WELL WATER TO BE USED AS: 5 Public water supply 8 Air conditioning 11 Injection well																																																																																							
		1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below)																																																																																							
		2 Irrigation 4 Industrial 7 Lawn and garden only 10 Monitoring ^{Wall}																																																																																							
Was a chemical/bacteriological sample submitted to Department? Yes.....No✓ ; If yes, mo/day/yr sample was submitted																																																																																									
Water Well Disinfected? Yes No ✓																																																																																									
5] TYPE OF BLANK CASING USED:																																																																																									
1 Steel		3 RMP (SR)	5 Wrought iron	8 Concrete tile	CASING JOINTS: Glued Clamped																																																																																				
2 PVC		4 ABS	6 Asbestos-Cement	9 Other (specify below)	Welded																																																																																				
			7 Fiberglass		Threaded. ✓																																																																																				
Blank casing diameter 2 in. to 10 ft. Dia in. to ft. Dia in. to ft.																																																																																									
Casing height above land surface 30 in., weight lbs./ft. Wall thickness or gauge No. . . . Sch. 40																																																																																									
TYPE OF SCREEN OR PERFORATION MATERIAL																																																																																									
1 Steel		3 Stainless steel	5 Fiberglass	7 PVC	10 Asbestos-cement																																																																																				
2 Brass		4 Galvanized steel	6 Concrete tile	8 RMP (SR)	11 Other (specify)																																																																																				
				9 ABS	12 None used (open hole)																																																																																				
SCREEN OR PERFORATION OPENINGS ARE:																																																																																									
1 Continuous slot		3 Mill slot	5 Gauzed wrapped	8 Saw cut	11 None (open hole)																																																																																				
2 Louvered shutter		4 Key punched	6 Wire wrapped	9 Drilled holes																																																																																					
			7 Torch cut	10 Other (specify)																																																																																					
SCREEN-PERFORATED INTERVALS: From 10 ft. to 25 ft. From ft. to ft.																																																																																									
From ft. to ft. From ft. to ft.																																																																																									
GRAVEL PACK INTERVALS: From 8 ft. to 25 ft. From ft. to ft.																																																																																									
From ft. to ft. From ft. to ft.																																																																																									
6] GROUT MATERIAL: 1 Neat cement 2 Cement grout 3 Bentonite 4 Other Concrete																																																																																									
Grout Intervals: From 0 ft. to 2.5 ft. From 2.5 ft. to 8 ft. From ft. to ft.																																																																																									
What is the nearest source of possible contamination:																																																																																									
1 Septic tank		4 Lateral lines	7 Pit privy	10 Livestock pens	14 Abandoned water well																																																																																				
2 Sewer lines		5 Cess pool	8 Sewage lagoon	11 Fuel storage	15 Oil well/Gas well																																																																																				
3 Watertight sewer lines		6 Seepage pit	9 Feedyard	12 Fertilizer storage	16 Other (specify below)																																																																																				
				13 Insecticide storage																																																																																					
Direction from well?																																																																																									
How many feet?
