

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																																																																			
County: Finney		SE ¼ SE ¼ NE ¼		T 24 S		R 34 W 8		R Sct. 21 E/W																																																																																																			
Distance and direction from nearest town or city street address of well if located within city? WW & IW Ponds T 24 S, R 34 S, Sect 21																																																																																																											
2 WATER WELL OWNER: Tyson Foods																																																																																																											
RR#, St. Address, Box #					Board of Agriculture, Division of Water Resources																																																																																																						
City, State, ZIP Code: Garden City, Ks					Application Number:																																																																																																						
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:					4 DEPTH OF COMPLETED WELL 170 ft. ELEVATION:																																																																																																						
					Depth(s) Groundwater Encountered 1 _____ ft. 2 _____ ft. 3 _____ ft.																																																																																																						
					WELL'S STATIC WATER LEVEL _____ ft. below land surface measured on mo/day/yr																																																																																																						
					Pump test data: Well water was _____ ft. after _____ hours pumping _____ gpm																																																																																																						
					Est. Yield _____ gpm: Well water was _____ ft. after _____ hours pumping _____ gpm																																																																																																						
Bore Hole Diameter 8 in. to 180 ft. and _____ in. to _____ ft.					WELL WATER TO BE USED AS:																																																																																																						
1 Domestic 3 Feed lot 6 Oil field water supply					8 Air conditioning 11 Injection well																																																																																																						
2 Irrigation 4 Industrial 7 Lawn and garden (domestic) 10 Monitoring well					9 Dewatering 12 Other (Specify below)																																																																																																						
Was a chemical/bacteriological sample submitted to Department? Yes _____ No X If yes, mo/day/yr sample was submitted _____					Water Well Disinfected? Yes _____ No X																																																																																																						
5 TYPE OF BLANK CASING USED:																																																																																																											
1 Steel 3 RMP (SR) 5 Wrought Iron 8 Concrete tile CASING JOINTS: Glued _____ Clamped _____																																																																																																											
2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded _____																																																																																																											
7 Fiberglass _____ Threaded _____																																																																																																											
Blank casing diameter 4 in. to 140 ft. Dia _____ in. to _____ ft. Dia _____ in. to _____ ft.																																																																																																											
Casing height above land surface 36 in., weight 2.071 lbs./ft. Wall thickness or gauge No. .237																																																																																																											
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																																																											
1 Steel 3 Stainless steel 5 Fiberglass 7 PVC 10 Asbestos-cement																																																																																																											
2 Brass 4 Galvanized steel 6 Concrete tile 8 RMP (SR) 11 Other (specify)																																																																																																											
9 ABS 12 None used (open hole)																																																																																																											
SCREEN OR PERFORATION OPENINGS ARE:																																																																																																											
1 Continuous slot 3 Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																																																											
2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes																																																																																																											
7 Torch cut 10 Other (specify)																																																																																																											
SCREEN-PERFORATED INTERVALS: From 140 ft. to 170 ft. From _____ ft. to _____ ft.																																																																																																											
GRAVEL PACK INTERVALS: From 138 ft. to 170 ft. From _____ ft. to _____ ft.																																																																																																											
6 GROUT MATERIAL:																																																																																																											
1 Neat cement 2 Cement grout 3 Bentonite 4 Other																																																																																																											
Grout intervals From 0 ft. to 135 ft. From 135 ft. to 138 ft. From _____ ft. to _____ ft.																																																																																																											
What is the nearest source of possible contamination:																																																																																																											
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well																																																																																																											
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/ Gas well																																																																																																											
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below)																																																																																																											
Contaminated site																																																																																																											
Direction from well? _____ How many feet? _____
