

1 LOCATION OF WATER WELL:		Fraction	Section Number		Township Number	Range Number																																																																		
County: Kearney		SE ¼ Se ¼ SW ¼	10		T 25 S	R 36 E/W																																																																		
Distance and direction from nearest town or city street address of well if located within city? 4 Mi S of Lakin			Global Positioning System (decimal degrees, min. of 4 digits)																																																																					
			Latitude: _____																																																																					
			Longitude: _____																																																																					
			Elevation: _____																																																																					
			Datum: _____																																																																					
			Data Collection Method: _____																																																																					
2 WATER WELL OWNER: Raymond Escamilla																																																																								
RR#, St. Address, Box # : P. O. Box 854																																																																								
City, State, ZIP Code : Lakin KS 67860																																																																								
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL 230 ft.																																																																						
		Depth(s) Groundwater Encountered 1 32 ft. 2 ft. 3 ft.																																																																						
		WELL'S STATIC WATER LEVEL 32 ft. below land surface measured on mo/day/yr																																																																						
		Pump test data: Well water was _____ ft. after _____ hours pumping _____ gpm																																																																						
		Est. Yield _____ gpm: Well water was _____ ft. after _____ hours pumping _____ gpm																																																																						
		WELL WATER TO BE USED AS: 5 Public water supply 8 Air conditioning 11 Injection well																																																																						
		Domestic 3 Feed lot 6 Oil field water supply 9 Dewatering 12 Other (Specify below)																																																																						
		Irrigation 4 Industrial 7 Domestic (lawn & garden) 10 Monitoring well																																																																						
		Was a chemical/bacteriological sample submitted to Department? Yes _____ No x ; If yes, mo/day/ysr																																																																						
		Sample was submitted _____ Water Well Disinfected? Yes x No _____																																																																						
5 TYPE OF CASING USED:																																																																								
1 Steel		3 RMP (SR)		5 Wrought Iron		8 Concrete tile																																																																		
2 PVC		4 ABS		6 Asbestos-Cement		CASING JOINTS: Glued _____ Clamped _____																																																																		
				7 Fiberglass		9 Other (specify below) _____ Welded _____																																																																		
						Eagle-loc _____ Threaded _____																																																																		
Blank casing diameter 5 in. to 230 ft., Dia _____ in. to _____ ft., Dia _____ in. to _____ ft.																																																																								
Casing height above land surface 24 in., Weight _____ lbs./ft. Wall thickness or gauge No. SDR21																																																																								
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																								
1 Steel		3 Stainless steel		5 Fiberglass		7 PVC																																																																		
2 Brass		4 Galvanized steel		6 Concrete tile		8 RM (SR)																																																																		
						9 ABS																																																																		
						11 Other (specify) _____																																																																		
						10 Asbestos-Cement																																																																		
						12 None used (open hole)																																																																		
SCREEN OR PERFORATION OPENINGS ARE:																																																																								
1 Continuous slot		3 Mill slot		5 Guaze wrapped		7 Torch cut																																																																		
2 Louvered shutter		4 Key punched		6 Wire wrapped		8 Saw Cut																																																																		
						9 Drilled holes																																																																		
						11 None (open hole)																																																																		
						10 Other (specify) _____																																																																		
SCREEN-PERFORATED INTERVALS:																																																																								
From 130 ft. to 150 ft.		From 170 ft. to 190 ft.																																																																						
From 210 ft. to _____ ft.		From _____ ft. to _____ ft.																																																																						
GRAVEL PACK INTERVALS:																																																																								
From _____ ft. to _____ ft.		From _____ ft. to _____ ft.																																																																						
From _____ ft. to _____ ft.		From _____ ft. to _____ ft.																																																																						
6 GROUT MATERIAL:																																																																								
1 Neat cement		2 Cement grout		3 Bentonite		4 Other _____																																																																		
Grout Intervals From 0 ft. to 50 ft.		From _____ ft. to _____ ft.		From _____ ft. to _____ ft.		From _____ ft. to _____ ft.																																																																		
What is the nearest source of possible contamination:																																																																								
1 Septic tank		4 Lateral lines		7 Pit privy		10 Livestock pens																																																																		
2 Sewer lines		5 Cess pool		8 Sewage lagoon		13 Insecticide Storage																																																																		
3 Watertight sewer lines		6 Seepage pit		9 Feedyard		16 Other (specify below)																																																																		
						11 Fuel storage																																																																		
						14 Abandoned water well																																																																		
						12 Fertilizer storage																																																																		
						15 Oil well/ gas well																																																																		
Direction from well?				How many feet? None observed
