

LOCATION OF WATER WELL: Sedgwick						FRACTION SE 1/4 NE 1/4 NE 1/4								SECTION NUMBER 27							TOWNSHIP NUMBER T 26 S									RANGE NUMBER R 1W E/W																																																																																																																																																					
Distance and direction from nearest town or city street address of well if located within city? 3/8 mile West of Hoover, 1/8th mile South of 45th St. N. Wichita, Kansas (4 plugs on 1 permit)																																																																																																																																																																																			
WATER WELL OWNER:															WICHITA, CITY OF																																																																																																																																																																				
RR#,ST. ADDRESS,BOX #:															455 N. Main																																																																																																																																																																				
CITY, STATE:															Wichita, Kansas															ZIP CODE:															Application Number: 20080047																																																																																																																																						
LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX: 1 Mile N E S W NW--NE SW--SE X															DEPTH OF PLUGGED WELL: 40 ft. ELEVATION:																																																																																																																																																																				
															Depth of groundwater Encountered: _____ ft.																																																																																																																																																																				
															WELL'S STATIC WATER LEVEL 12 FT. BELOW LAND SURFACE MEASURED ON mo/day/yr: 8/26/08																																																																																																																																																																				
															Pump test data: Well water was _____ ft. after _____ hours of pumping @ _____ gpm. Est. Yield: _____ gpm Well water was _____ ft. after _____ hours of pumping @ _____ gpm. Bore Hole Diameter 12 in. to _____ ft. and _____ in. to _____ ft.																																																																																																																																																																				
															WELL WATER USE USED AS: 1. Domestic 3. Feedlot 5. Public water supply 7. Lawn and garden only 9. Dewatering 11. Injection well 2. Irrigation 4. Industrial 6. Oil field water supply 8. Air conditioning 10. Monitoring well 12. Other (Specify below) Was a chemical/bacteriological sample submitted to Department? YES NO ; If yes, what mo/day/yr was sample submitted Was Water Well Disinfected? YES NO																																																																																																																																																																				
TYPE OF CASING USED: 1. Steel 3. RPM (SR) 5. Wrought Iron 7. Fiberglass 9. Other (Specify below)																																																																																																																																																																																			
CASING JOINTS: Glued Threaded Welded Clamped																																																																																																																																																																																			
Blank casing diameter 8 in. to _____ ft., Dia. in. to _____ ft., Dia. in. to _____ ft.																																																																																																																																																																																			
Casing height below land surface: 36 in., Weight: lbs. / ft. Wall thickness or gauge No. _____																																																																																																																																																																																			
TYPE OF SCREEN OR PERFORATION MATERIAL: 1. Steel 3. Stainless Steel 5. Fiberglass 7. PVC 9. ABS 11. Other (specify) N/A 2. Brass 4. Galvanized 6. Concrete Tile 8. RMP (SR) 10. Asbestos-Cement 12. None used (open hole)																																																																																																																																																																																			
SCREEN OR PERFORATION OPENINGS ARE: 1. Continuous slot 3. Mill slot 5. Gauzed wrapped 7. Torch cut 9. Drilled holes 11. None (open hole) 2. Louvered shutter 4. Key punched 6. Wire wrapped 8. Saw cut 10. Other (specify) N/A																																																																																																																																																																																			
SCREEN - PERFORATION INTERVAL From _____ ft. to _____ ft., From _____ ft. to _____ ft. GRAVEL PACK INTERVALS: From _____ ft. to _____ ft., From _____ ft. to _____ ft.																																																																																																																																																																																			
GROUT MATERIALS: 1. Neat cement 2. Cement Grout 3. Bentonite Other bentonite hole plug Grout Intervals: From _____ ft. to _____ ft., From _____ ft. to _____ ft., From _____ ft. to _____ ft.																																																																																																																																																																																			
What is the nearest source of possible contamination: 1. Septic tank 4. Lateral lines 7. Pit privy 10. Livestock pens 13. Insecticide storage 15. Oil well/Gas well 2. Sewer lines 5. Cess Pool 8. Sewage lagoon 11. Fuel storage 14. Abandon water well 16. Other (specify below) 3. Watertight sewer line 6. Seepage pit 9. Feed yard 12. Fertilizer storage None Apparent Direction from well? How many feet?
