

<b>1 LOCATION OF WATER WELL:</b>		<b>Fraction</b>		<b>Section Number</b>	<b>Township Number</b>		<b>Range Number</b>																																																																																																	
County: Ford		NW 1/4 SW 1/4 NE 1/4		12	T 26 S		R 26 <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">EW</span>																																																																																																	
Distance and direction from nearest town or city street address of well if located within city? From Dodge City, Ks. - 5 miles West on highway 50 and 2 1/2 miles North																																																																																																								
<b>2 WATER WELL OWNER:</b> Rex Stanley Feedyard, Inc.																																																																																																								
RR#, St. Address, Box # :			R.R. 2, Box 238			Board of Agriculture, Division of Water Resources																																																																																																		
City, State, ZIP Code :			Dodge City, Kansas 67801			Application Number: 38,047																																																																																																		
<b>3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:</b>			<b>4 DEPTH OF COMPLETED WELL:</b> 220 ft. <b>ELEVATION:</b>																																																																																																					
<div style="text-align: center;"></div>			Depth(s) Groundwater Encountered 1. .... ft. 2. .... ft. 3. .... ft.																																																																																																					
			WELL'S STATIC WATER LEVEL ... 101 ... ft. below land surface measured on mo/day/yr March 29, 1986																																																																																																					
			Pump test data: Well water was .... ft. after .... hours pumping .... gpm																																																																																																					
			Est. Yield ... 75 ... gpm: Well water was .... ft. after .... hours pumping .... gpm																																																																																																					
			Bore Hole Diameter ... 12 ... in. to ... 220 ... ft., and ... in. to ... ft.																																																																																																					
<b>WELL WATER TO BE USED AS:</b>																																																																																																								
5 Public water supply      8 Air conditioning      11 Injection well																																																																																																								
1 Domestic      3 Feedlot      6 Oil field water supply      9 Dewatering      12 Other (Specify below)																																																																																																								
2 Irrigation      4 Industrial      7 Lawn and garden only      10 Observation well																																																																																																								
Was a chemical/bacteriological sample submitted to Department? Yes.....No...XX..... If yes, mo/day/yr sample was submitted																																																																																																								
Water Well Disinfected? Yes XX No																																																																																																								
<b>5 TYPE OF BLANK CASING USED:</b>																																																																																																								
1 Steel			3 RMP (SR)			5 Wrought iron																																																																																																		
2 PVC			4 ABS			6 Asbestos-Cement																																																																																																		
						7 Fiberglass																																																																																																		
Blank casing diameter ... 6 ... in. to ... 220 ... ft., Dia ... in. to ... ft., Dia ... in. to ... ft.																																																																																																								
Casing height above land surface ... 12 ... in., weight ... 200 psi ... lbs./ft. Wall thickness or gauge No. SDR 21																																																																																																								
<b>TYPE OF SCREEN OR PERFORATION MATERIAL:</b>																																																																																																								
1 Steel			3 Stainless steel			5 Fiberglass																																																																																																		
2 Brass			4 Galvanized steel			6 Concrete tile																																																																																																		
						7 PVC																																																																																																		
						8 RMP (SR)																																																																																																		
						9 ABS																																																																																																		
						10 Asbestos-cement																																																																																																		
						11 Other (specify) .....																																																																																																		
						12 None used (open hole)																																																																																																		
<b>SCREEN OR PERFORATION OPENINGS ARE:</b>																																																																																																								
1 Continuous slot			3 Mill slot			5 Gauzed wrapped																																																																																																		
2 Louvered shutter			4 Key punched			6 Wire wrapped																																																																																																		
						7 Torch cut																																																																																																		
						8 Saw cut																																																																																																		
						9 Drilled holes																																																																																																		
						10 Other (specify) .....																																																																																																		
						11 None (open hole)																																																																																																		
<b>SCREEN-PERFORATED INTERVALS:</b> From ... 185 ... ft. to ... 215 ... ft., From ... ft. to ... ft.																																																																																																								
From ... ft. to ... ft., From ... ft. to ... ft.																																																																																																								
<b>GRAVEL PACK INTERVALS:</b> From ... 20 ... ft. to ... 220 ... ft., From ... ft. to ... ft.																																																																																																								
From ... ft. to ... ft., From ... ft. to ... ft.																																																																																																								
<b>6 GROUT MATERIAL:</b> 1 Neat cement      2 Cement grout      3 Bentonite      4 Other .....																																																																																																								
Grout Intervals: From ... 5 ... ft. to ... 20 ... ft., From ... ft. to ... ft., From ... ft. to ... ft.																																																																																																								
What is the nearest source of possible contamination:																																																																																																								
1 Septic tank			4 Lateral lines			7 Pit privy																																																																																																		
2 Sewer lines			5 Cess pool			8 Sewage lagoon																																																																																																		
3 Watertight sewer lines			6 Seepage pit			9 Feedyard																																																																																																		
						10 Livestock pens																																																																																																		
						11 Fuel storage																																																																																																		
						12 Fertilizer storage																																																																																																		
						13 Insecticide storage																																																																																																		
						14 Abandoned water well																																																																																																		
						15 Oil well/Gas well																																																																																																		
						16 Other (specify below)																																																																																																		
Direction from well? North						How many feet? 50
