

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																																			
County: Reno		NE ¼ NE ¼ NE ¼		15		T 26 S		R 7 E/W																																																																			
Distance and direction from nearest town or city street address of well if located within city? Approximately ½ mile north and 2 miles west of Pretty Prairie																																																																											
2 WATER WELL OWNER:		Equus Beds GMD #2																																																																									
RR#, St. Address, Box # :		313 Spruce																																																																									
City, State, ZIP Code :		Halstead, KS 67056-1925																																																																									
		Board of Agriculture, Division of Water Resources Application Number:																																																																									
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL 108 ft. ELEVATION: unknown																																																																									
N 1 Mile W E S 		Depth(s) Groundwater Encountered 1. ft. 2. ft. 3. ft.																																																																									
		WELL'S STATIC WATER LEVEL 53.2 ft. below land surface measured on mo/day/yr 2-3-92																																																																									
		Pump test data: Well water was not ch'd. ft. after hours pumping gpm																																																																									
		Est. Yield unknown gpm: Well water was ft. after hours pumping gpm																																																																									
		Bore Hole Diameter 6 1/4 in. to 11 1/2 in. and in. to ft.																																																																									
		WELL WATER TO BE USED AS:																																																																									
		5 Public water supply 8 Air conditioning 11 Injection well																																																																									
		1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below)																																																																									
		2 Irrigation 4 Industrial 7 Lawn and garden only 10 Monitoring well																																																																									
		Was a chemical/bacteriological sample submitted to Department? Yes No X; If yes, mo/day/yr sample was submitted																																																																									
		Water Well Disinfected? Yes No X																																																																									
5 TYPE OF BLANK CASING USED:																																																																											
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued X Clamped																																																																											
2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded																																																																											
7 Fiberglass Threaded X																																																																											
Blank casing diameter steel 2 in. to 7 ft. Dia. PVC 2 in. to 9 1/2 ft. Dia. in. to ft.																																																																											
Casing height above land surface steel 36 in. weight steel 3.65 PVC 70 lbs./ft. Wall thickness or gauge No. 154																																																																											
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																											
1 Steel 3 Stainless steel 5 Fiberglass 7 PVC 10 Asbestos-cement																																																																											
2 Brass 4 Galvanized steel 6 Concrete tile 8 RMP (SR) 11 Other (specify)																																																																											
12 None used (open hole)																																																																											
SCREEN OR PERFORATION OPENINGS ARE:																																																																											
1 Continuous slot 3 Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																											
2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes																																																																											
7 Torch cut 10 Other (specify)																																																																											
SCREEN-PERFORATED INTERVALS: From 95 ft. to 105 ft. From ft. to ft.																																																																											
From ft. to ft. From ft. to ft.																																																																											
GRAVEL PACK INTERVALS: From 90 ft. to 115 ft. From ft. to ft.																																																																											
From ft. to ft. From ft. to ft.																																																																											
6 GROUT MATERIAL: 1 Neat cement 2 Cement grout 3 Bentonite 4 Other Bentonite Holeplug																																																																											
Grout Intervals: From ft. to ft. From ft. to ft. From 0 ft. to 90 ft.																																																																											
What is the nearest source of possible contamination:																																																																											
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well																																																																											
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/Gas well																																																																											
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below)																																																																											
13 Insecticide storage None known																																																																											
Direction from well? How many feet?
