

165 8576 Well #3		Form WWC-5		Division of Water Resources; App. No.		44,633																																																																									
1 LOCATION OF WATER WELL:				Fraction		Section Number																																																																									
County: Phillips				NW 1/4 NW 1/4 NE 1/4		8																																																																									
Distance and direction from nearest town or city street address of well if located within city? Approximately 3 1/4 miles south and 2 1/2 miles east of Long Island				Global Positioning Systems (decimal degrees, min. of 4 digits)																																																																											
				Latitude: 39.900222																																																																											
				Longitude: -99.48626																																																																											
2 WATER WELL OWNER: Phillips County Rural District #1				Elevation: Unknown																																																																											
RR#, St. Address, Box # : 276 W. State Street				Datum: NAD83																																																																											
City, State, ZIP Code : Phillipsburg, KS 67661				Data Collection Method: WAAS GPS Unit																																																																											
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL 156 ft.																																																																													
<div style="text-align: center;"> </div>		Depth(s) Groundwater Encountered (1) _____ ft. (2) _____ ft. (3) _____ ft.																																																																													
		WELL'S STATIC WATER LEVEL 120 ft. below land surface measured on mo/day/yr 07-11-07																																																																													
		Pump test data: Well water was Not checked ft. after _____ hours pumping _____ gpm																																																																													
		Est. Yield Unknown gpm: Well water was _____ ft. after _____ hours pumping _____ gpm																																																																													
		WELL WATER TO BE USED AS: (5) Public water supply 8 Air conditioning 11 Injection well																																																																													
		1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below)																																																																													
		2 Irrigation 4 Industrial 7 Domestic (lawn & garden) 10 Monitoring well																																																																													
		Was a chemical/bacteriological sample submitted to Department? Yes _____ No <input checked="" type="checkbox"/> If yes, mo/day/yr _____																																																																													
		Sample was submitted _____ Water well disinfected? Yes <input checked="" type="checkbox"/> No _____																																																																													
5 TYPE OF CASING USED:																																																																															
1 Steel 3 RMP (SR) 6 Asbestos-Cement 9 Other (specify below) _____																																																																															
(2) PVC 4 ABS 7 Fiberglass _____																																																																															
Blank casing diameter 8 in. to 134 ft., Diameter _____ in. to _____ ft., Diameter _____ in. to _____ ft.																																																																															
Casing height above land surface 12 in., weight 8.25 lbs./ft. Wall thickness or gauge No. 500																																																																															
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																															
1 Steel (3) Stainless Steel 5 Fiberglass 7 PVC 9 ABS 11 Other (Specify) _____																																																																															
2 Brass 4 Galvanized Steel 6 Concrete tile 8 RM (SR) 10 Asbestos-Cement 12 None used (open hole)																																																																															
SCREEN OR PERFORATION OPENINGS ARE:																																																																															
(1) Continuous slot 3 Mill slot 5 Gauzed wrapped 7 Torch cut 9 Drilled holes 11 None (open hole)																																																																															
2 Louvered shutter 4 Key punched 6 Wire wrapped 8 Saw Cut 10 Other (Specify) _____																																																																															
SCREEN-PERFORATED INTERVALS: From 134 ft. to 155 ft., From _____ ft. to _____ ft.																																																																															
From _____ ft. to _____ ft., From _____ ft. to _____ ft.																																																																															
GRAVEL PACK INTERVALS: From 100 ft. to 155 ft., From _____ ft. to _____ ft.																																																																															
From 26 ft. to 80 ft., From _____ ft. to _____ ft.																																																																															
6 GROUT MATERIAL: 1 Neat Cement (2) Cement grout 3 Bentonite (4) Other _____ Bentonite Holeplug																																																																															
Compacted Soil																																																																															
Grout Intervals: From 0-6 ft. to _____ ft., From 6-26 ft. to _____ ft., From 80-100 ft. to _____ ft.																																																																															
What is the nearest source of possible contamination:																																																																															
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 13 Insecticide Storage (16) Other (specify below)																																																																															
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 14 Abandoned water well None known																																																																															
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer Storage 15 Oil well/gas well																																																																															
Direction from well? _____ How many feet? _____
