

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																	
County: <u>Kingman</u>		<u>NC 1/4 N 1/2 1/4 NW 1/4</u>		<u>30</u>		T <u>30</u> S		R <u>30</u> E/W																																																	
Distance and direction from nearest town or city street address of well if located within city? <u>one mile south 1/2 west 1/4 south of Nashville Ks.</u>																																																									
2 WATER WELL OWNER: <u>Anderson's Farms</u>																																																									
RR#, St. Address, Box #: <u>221 North main</u> Board of Agriculture, Division of Water Resources																																																									
City, State, ZIP Code: <u>220 Burkett</u> <u>Kingman, Kansas</u> Application Number:																																																									
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:					4 DEPTH OF COMPLETED WELL: <u>50</u> ft. ELEVATION:																																																				
					Depth(s) Groundwater Encountered 1. ft. 2. ft. 3. ft.																																																				
					WELL'S STATIC WATER LEVEL <u>32</u> ft. below land surface measured on mo/day/yr <u>3/16/91</u>																																																				
					Pump test data: Well water was ft. after hours pumping gpm																																																				
					Est. Yield gpm: Well water was ft. after hours pumping gpm																																																				
Bore Hole Diameter: <u>12</u> in. to <u>50</u> ft., and in. to ft.					WELL WATER TO BE USED AS:																																																				
1 Domestic					3 Feedlot		6 Oil field water supply		9 Dewatering																																																
2 Irrigation					4 Industrial		7 Lawn and garden only		10 Monitoring well																																																
Was a chemical/bacteriological sample submitted to Department? Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/>					If yes, mo/day/yr sample was submitted																																																				
Water Well Disinfected? Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/>																																																									
5 TYPE OF BLANK CASING USED:																																																									
1 Steel																																																									
2 PVC																																																									
3 RMP (SR)																																																									
4 ABS																																																									
5 Wrought iron																																																									
6 Asbestos-Cement																																																									
7 Fiberglass																																																									
8 Concrete tile																																																									
9 Other (specify below)																																																									
CASING JOINTS: Glued <input checked="" type="checkbox"/> Clamped <input checked="" type="checkbox"/>																																																									
Welded <input checked="" type="checkbox"/>																																																									
Threaded <input checked="" type="checkbox"/>																																																									
Blank casing diameter <u>5</u> in. to <u>30</u> ft., Dia. in. to ft., Dia. in. to ft.																																																									
Casing height above land surface <u>2 feet</u> in., weight lbs./ft. Wall thickness or gauge No.																																																									
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																									
1 Steel																																																									
2 Brass																																																									
3 Stainless steel																																																									
4 Galvanized steel																																																									
5 Fiberglass																																																									
6 Concrete tile																																																									
7 PVC																																																									
8 RMP (SR)																																																									
9 ABS																																																									
10 Asbestos-cement																																																									
11 Other (specify)																																																									
12 None used (open hole)																																																									
SCREEN OR PERFORATION OPENINGS ARE:																																																									
1 Continuous slot																																																									
2 Louvered shutter																																																									
3 Mill slot																																																									
4 Key punched																																																									
5 Gauzed wrapped																																																									
6 Wire wrapped																																																									
7 Torch cut																																																									
8 Saw cut																																																									
9 Drilled holes																																																									
10 Other (specify)																																																									
11 None (open hole)																																																									
SCREEN-PERFORATED INTERVALS: From <u>30</u> ft. to <u>50</u> ft., From ft. to ft.																																																									
From ft. to ft., From ft. to ft.																																																									
GRAVEL PACK INTERVALS: From <u>10</u> ft. to <u>50</u> ft., From ft. to ft.																																																									
From ft. to ft., From ft. to ft.																																																									
6 GROUT MATERIAL:																																																									
1 Neat cement																																																									
2 Cement grout																																																									
3 Bentonite																																																									
4 Other																																																									
Grout Intervals: From <u>1</u> ft. to <u>10</u> ft., From ft. to ft., From ft. to ft.																																																									
What is the nearest source of possible contamination:																																																									
1 Septic tank																																																									
2 Sewer lines																																																									
3 Watertight sewer lines																																																									
4 Lateral lines																																																									
5 Cess pool																																																									
6 Seepage pit																																																									
7 Pit privy																																																									
8 Sewage lagoon																																																									
9 Feedyard																																																									
10 Livestock pens																																																									
11 Fuel storage																																																									
12 Fertilizer storage																																																									
13 Insecticide storage																																																									
14 Abandoned water well																																																									
15 Oil well/Gas well																																																									
16 Other (specify below)																																																									
<u>NONE</u> <u>these land</u>																																																									
Direction from well?																																																									
How many feet?																																																									
<table border="1" style="width:100%; border-collapse: collapse;"> <thead> <tr> <th>FROM</th> <th>TO</th> <th>LITHOLOGIC LOG</th> <th>FROM</th> <th>TO</th> <th>PLUGGING INTERVALS</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>1</td> <td>Top Soil</td> <td></td> <td></td> <td></td> </tr> <tr> <td>1</td> <td>10</td> <td>Sand</td> <td></td> <td></td> <td></td> </tr> <tr> <td>10</td> <td>20</td> <td>Sandy clay</td> <td></td> <td></td> <td></td> </tr> <tr> <td>20</td> <td>30</td> <td>Sandy silt</td> <td></td> <td></td> <td></td> </tr> <tr> <td>30</td> <td>40</td> <td>Clay Brown</td> <td></td> <td></td> <td></td> </tr> <tr> <td>40</td> <td>50</td> <td>Coarse Gravel</td> <td></td> <td></td> <td></td> </tr> <tr> <td colspan="6" style="text-align: center;"> <p>Total Depth of Well 50 feet</p> <p>Clay Bottom</p> </td> </tr> </tbody> </table>										FROM	TO	LITHOLOGIC LOG	FROM	TO	PLUGGING INTERVALS	0	1	Top Soil				1	10	Sand				10	20	Sandy clay				20	30	Sandy silt				30	40	Clay Brown				40	50	Coarse Gravel				<p>Total Depth of Well 50 feet</p> <p>Clay Bottom</p>
