

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																																																																	
County: Stevens		NW 1/4 SE 1/4 SE 1/4		29		T 33S S		R 38W E/W																																																																																																	
Distance and direction from nearest town or city street address of well if located within city?																																																																																																									
1 1/2 miles SE of Feterita, KS --																																																																																																									
2 WATER WELL OWNER:		Norseman Drilling				#1 Light U																																																																																																			
RR#, St. Address, Box # :		307 Farmers & Bankers Bldg. 200 E First				Board of Agriculture, Division of Water Resources																																																																																																			
City, State, ZIP Code :		Wichita, KS 67202				Application Number: 930160																																																																																																			
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL: 420 ft. ELEVATION:																																																																																																							
		Depth(s) Groundwater Encountered 1. 140 ft. 2. ft. 3. ft.																																																																																																							
		WELL'S STATIC WATER LEVEL 140 ft. below land surface measured on mo/day/yr 05-11-93																																																																																																							
		Pump test data: Well water was 150 ft. after 1 hours pumping 100 gpm																																																																																																							
		Est. Yield 100 gpm: Well water was ft. after hours pumping gpm																																																																																																							
		Bore Hole Diameter 9 1/2 in. to 420 ft. and in. to ft.																																																																																																							
WELL WATER TO BE USED AS:		5 Public water supply 8 Air conditioning 11 Injection well 1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below) 2 Irrigation 4 Industrial 7 Lawn and garden only 10 Monitoring well																																																																																																							
Was a chemical/bacteriological sample submitted to Department? Yes No X; If yes, mo/day/yr sample was submitted																																																																																																									
Water Well Disinfected? Yes X No																																																																																																									
5 TYPE OF BLANK CASING USED:																																																																																																									
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued X Clamped 2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded Blank casing diameter 5 in. to 420 ft. Dia in. to ft. Dia in. to ft. Casing height above land surface 24 in. weight 2.902 lbs./ft. Wall thickness or gauge No. 280 SDR 21																																																																																																									
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																																																									
1 Steel 3 Stainless steel 5 Fiberglass 8 RMP (SR) 10 Asbestos-cement 2 Brass 4 Galvanized steel 6 Concrete tile 9 ABS 11 Other (specify) 12 None used (open hole)																																																																																																									
SCREEN OR PERFORATION OPENINGS ARE:																																																																																																									
1 Continuous slot 3 Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole) 2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes 7 Torch cut 10 Other (specify)																																																																																																									
SCREEN-PERFORATED INTERVALS: From 300 ft. to 400 ft. From ft. to ft. From ft. to ft.																																																																																																									
GRAVEL PACK INTERVALS: From 200 ft. to 400 ft. From ft. to ft. From ft. to ft.																																																																																																									
6 GROUT MATERIAL: 1 Neat cement 2 Cement grout 3 Bentonite 4 Other Hole plug																																																																																																									
Grout Intervals: From 1 ft. to 20 ft. From ft. to ft. From ft. to ft.																																																																																																									
What is the nearest source of possible contamination:																																																																																																									
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well 2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/Gas well 3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below) 13 Insecticide storage																																																																																																									
Direction from well? Northwest How many feet? 220
