

1 LOCATION OF WATER WELL: County: Stevens		Fraction C 1/4 NE 1/4 SE 1/4		Section Number 11	Township Number T 35 S	Range Number R 36 EW																																																																																																
Distance and direction from nearest town or city street address of well if located within city? N. of Hooker to State Line 1N., 1E., .3N., W., into																																																																																																						
2 WATER WELL OWNER: McCoy Pet. RR#, St. Address, Box # : 3017 N. Cypress St. City, State, ZIP Code : Wichita, KS 67226				#1-11 Roehr "A" Board of Agriculture, Division of Water Resources Application Number: 960408																																																																																																		
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:		4 DEPTH OF COMPLETED WELL: 340 ft. ELEVATION: _____ ft.																																																																																																				
1 Mile		Depth(s) Groundwater Encountered 1. 145 ft. 2. _____ ft. 3. _____ ft.																																																																																																				
		WELL'S STATIC WATER LEVEL 145 ft. below land surface measured on mo/day/yr 10-24-96																																																																																																				
		Pump test data: Well water was 155 ft. after 1 hours pumping 120 gpm																																																																																																				
		Est. Yield 120 gpm: Well water was _____ ft. after _____ hours pumping _____ gpm																																																																																																				
		Bore Hole Diameter 11 in. to 340 ft., and _____ in. to _____ ft.																																																																																																				
		WELL WATER TO BE USED AS: 1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below) 2 Irrigation 4 Industrial 7 Lawn and garden only 10 Monitoring well																																																																																																				
		Was a chemical/bacteriological sample submitted to Department? Yes _____ No X ; If yes, mo/day/yr sample was submitted _____																																																																																																				
		Water Well Disinfected? Yes X No _____																																																																																																				
5 TYPE OF BLANK CASING USED:																																																																																																						
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued X Clamped _____																																																																																																						
2 PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded _____																																																																																																						
7 Fiberglass _____ Threaded _____																																																																																																						
Blank casing diameter 6 in. to 340 ft., Dia _____ in. to _____ ft., Dia _____ in. to _____ ft.																																																																																																						
Casing height above land surface 24 in., weight 2.902 lbs./ft. Wall thickness or gauge No. .280 SDR 21																																																																																																						
TYPE OF SCREEN OR PERFORATION MATERIAL:																																																																																																						
1 Steel 3 Stainless steel 5 Fiberglass 8 RMP (SR) 10 Asbestos-cement																																																																																																						
2 Brass 4 Galvanized steel 6 Concrete tile 9 ABS 11 Other (specify) _____																																																																																																						
12 None used (open hole)																																																																																																						
SCREEN OR PERFORATION OPENINGS ARE:																																																																																																						
1 Continuous slot 3 Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																																																						
2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes																																																																																																						
7 Torch cut 10 Other (specify) _____																																																																																																						
SCREEN-PERFORATED INTERVALS: From 280 ft. to 340 ft., From _____ ft. to _____ ft.																																																																																																						
From _____ ft. to _____ ft., From _____ ft. to _____ ft.																																																																																																						
GRAVEL PACK INTERVALS: From 180 ft. to 340 ft., From _____ ft. to _____ ft.																																																																																																						
From _____ ft. to _____ ft., From _____ ft. to _____ ft.																																																																																																						
6 GROUT MATERIAL: 1 Neat cement 2 Cement grout 3 Bentonite 4 Other Hole Plug																																																																																																						
Grout Intervals: From 0 ft. to 16 ft., From _____ ft. to _____ ft., From _____ ft. to _____ ft.																																																																																																						
What is the nearest source of possible contamination:																																																																																																						
1 Septic tank 4 Lateral lines 7 Pit privy 10 Livestock pens 14 Abandoned water well																																																																																																						
2 Sewer lines 5 Cess pool 8 Sewage lagoon 11 Fuel storage 15 Oil well/Gas well																																																																																																						
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 12 Fertilizer storage 16 Other (specify below) _____																																																																																																						
13 Insecticide storage _____																																																																																																						
Direction from well? West How many feet? 400
