

1 LOCATION OF WATER WELL:		Fraction		Section Number		Township Number		Range Number																																																																																																	
County: Osborne		NE 1/4 <u>SE</u> SE 1/4 NE 1/4		28		T <u>6</u> S		R 11 EW																																																																																																	
Distance and direction from nearest town or city street address of well if located within city? 175' SW of the SW corner of Delay St. & Morgan St.																																																																																																									
2 WATER WELL OWNER:																																																																																																									
City of Downs					Board of Agriculture, Division of Water Resources																																																																																																				
RR#, St. Address, Box # : 715 Railroad					Application Number:																																																																																																				
City, State, ZIP Code : Downs, Kansas																																																																																																									
3 LOCATE WELL'S LOCATION WITH AN "X" IN SECTION BOX:			4 DEPTH OF COMPLETED WELL <u>40</u> ft. ELEVATION:																																																																																																						
<div style="text-align: center;"> </div>			Depth(s) Groundwater Encountered 1. <u>23</u> ft. 2. ft. 3. ft.																																																																																																						
			WELL'S STATIC WATER LEVEL ft. below land surface measured on mo/day/yr																																																																																																						
			Pump test data: Well water was <u>NA</u> ft. after hours pumping gpm																																																																																																						
			Est. Yield <u>NA</u> gpm: Well water was ft. after hours pumping gpm																																																																																																						
			Bore Hole Diameter <u>8</u> in. to <u>40</u> ft. and in. to ft.																																																																																																						
WELL WATER TO BE USED AS: 5 Public water supply 8 Air conditioning 11 Injection well																																																																																																									
1 Domestic 3 Feedlot 6 Oil field water supply 9 Dewatering 12 Other (Specify below)																																																																																																									
2 Irrigation 4 Industrial 7 Lawn and garden only <u>10</u> Monitoring well																																																																																																									
Was a chemical/bacteriological sample submitted to Department? Yes No <input checked="" type="checkbox"/> If yes, mo/day/yr sample was submitted																																																																																																									
Water Well Disinfected? Yes No <input checked="" type="checkbox"/>																																																																																																									
5 TYPE OF BLANK CASING USED:																																																																																																									
1 Steel 3 RMP (SR) 5 Wrought iron 8 Concrete tile CASING JOINTS: Glued Clamped																																																																																																									
<u>2</u> PVC 4 ABS 6 Asbestos-Cement 9 Other (specify below) Welded																																																																																																									
7 Fiberglass Threaded. <input checked="" type="checkbox"/>																																																																																																									
Blank casing diameter <u>2</u> in. to <u>29</u> ft. Dia in. to ft. Dia in. to ft.																																																																																																									
Casing height above land surface <u>0</u> in., weight <u>Sch 40</u> lbs./ft. Wall thickness or gauge No.																																																																																																									
TYPE OF SCREEN OR PERFORATION MATERIAL																																																																																																									
1 Steel 3 Stainless steel 5 Fiberglass <u>7</u> PVC 10 Asbestos-cement																																																																																																									
2 Brass 4 Galvanized steel 6 Concrete tile 8 RMP (SR) 11 Other (specify)																																																																																																									
9 ABS 12 None used (open hole)																																																																																																									
SCREEN OR PERFORATION OPENINGS ARE:																																																																																																									
1 Continuous slot <u>3</u> Mill slot 5 Gauzed wrapped 8 Saw cut 11 None (open hole)																																																																																																									
2 Louvered shutter 4 Key punched 6 Wire wrapped 9 Drilled holes																																																																																																									
7 Torch cut 10 Other (specify)																																																																																																									
SCREEN-PERFORATED INTERVALS: From <u>29</u> ft. to <u>39</u> ft. From ft. to ft.																																																																																																									
From ft. to ft. From ft. to ft.																																																																																																									
GRAVEL PACK INTERVALS: From <u>27.5</u> ft. to <u>40</u> ft. From ft. to ft.																																																																																																									
From ft. to ft. From ft. to ft.																																																																																																									
6 GROUT MATERIAL: 1 Neat cement <u>2</u> Cement grout <u>3</u> Bentonite 4 Other																																																																																																									
Grout Intervals: From <u>0</u> ft. to <u>2</u> ft. From <u>2</u> ft. to <u>27.5</u> ft. From ft. to ft.																																																																																																									
What is the nearest source of possible contamination:																																																																																																									
1 Septic tank 4 Lateral lines 7 Pit privy <u>11</u> Fuel storage 14 Abandoned water well																																																																																																									
2 Sewer lines 5 Cess pool 8 Sewage lagoon 12 Fertilizer storage 15 Oil well/Gas well																																																																																																									
3 Watertight sewer lines 6 Seepage pit 9 Feedyard 13 Insecticide storage 16 Other (specify below)																																																																																																									
Direction from well? <u>NE</u> How many feet? <u>205</u>
