Topic	Answer
1. What is the main purpose of the study?	To investigate the effect of the new curriculum on the learning outcomes of the students.
2. What are the research objectives?	To compare the learning outcomes of the students who were taught using the new curriculum with those who were taught using the old curriculum.
3. What is the research hypothesis?	The students who were taught using the new curriculum will have higher learning outcomes than those who were taught using the old curriculum.
4. What is the significance of the study?	The study is significant because it will provide information about the effectiveness of the new curriculum and help to make decisions about whether to implement it on a larger scale.
5. What are the limitations of the study?	The study is limited to a small sample of students and only measures learning outcomes. It does not measure other factors such as student motivation or teacher satisfaction.
6. What are the conclusions of the study?	The study concludes that the new curriculum has a positive effect on the learning outcomes of the students.
7. What are the recommendations of the study?	The study recommends that the new curriculum be implemented on a larger scale and that further research be conducted to investigate its effectiveness in other contexts.
